Detailed description of project						Type of services provided		
<p>Prefeasibility study of the Lopar tourist infrastructure project. Lopar is a well-known tourist destination in Croatia based on Island of Rab. In order to understand future tourism development in Lopar the tourist association of Lopar and municipality designed some project ideas for future implementation. Prefeasibility study was used to understand costs and benefits of each project proposed and to develop understanding of impact of implementing different projects. The study suggested basic necessary strategy of destination management in coordination with city of Rab and developed three possible investment possibilities which will need to mature and be decided in further processes.</p>						<ul style="list-style-type: none"> • Strategic planning • Zoning • Evaluation of possibilities • Cost benefit study
